Subject
Stratigraphic Guide to Rogaland Group; Norwegian North Sea

Dear Mr Brunstad,

Thank you kindly for sharing with us at TNO (that now incorporates also the Geological Survey of the Netherlands) a preprint of the 'Stratigraphic Guide to the Rogaland Group, Norwegian North Sea. My colleague, Dr. D. Munsterman, provided me this copy already a few years ago, when it first was circulated and placed on your excellent Noriex website.

As project manager and as senior author of the "*Petroleum Geological Atlas of the Southern Permian Basin Area*", I cannot stress enough how important it is to nicely follow the Guidelines of the International Stratigraphic Code (1964), and at the same time linking Norwegian subsurface lithostratigraphy to that across its borders in UK and Denmark, and potentially The Netherlands. Lithostratigraphy does not know political borders.

Your major update of the Rogaland Group shale-sand system and carbonate olistolith 'orphan' is most welcome. On behalf of me and my colleagues I like to congratulate you on a superb example of modern subsurface lithostratigraphic research and synthesis.

With best regards

Hans Doornenbal

Project Manager
